

Bead Stringing Wire

Bead Stringing Wire consists of seven thin stainless steel wires which give flexibility, softness and strength by being twisted together. The transparent GRIFFIN nylon coating ensures great durability, lasting flexibility and good protection against abrasion. GRIFFIN Bead Stringing Wire is soft and flexible enough to be knotted. It is an economically priced alternative to our high-quality Jewelry Wire.

GRIFFIN Bead Stringing Wire does not need an additional needle for stringing.

Available colours:

This is how you select the correct Stainless Steel Wire:

Jewelry Wire 49 strand

This Stainless Steel Wire is preferred by professional jewelry designers because of its high flexibility. Unsurpassed in strength, softness and flexibility. It has no tension and therefore will not produce an unsightly "corkscrew effect".

Jewelry Wire 19 strand

This ideal all-round Stainless Steel Wire combines excellent strength and flexibility and is good value for money. It has no tension and therefore will not produce an unsightly "corkscrew effect".

Bead Stringing Wire 7 strand

Good flexibility and strength are the characteristics of this Stainless Steel Wire. Unsurpassed in its wide range of colours, it is economically priced.

For working with Stainless Steel Wire, we offer special tools and accessories which make this versatile material easier to handle:

Jewelry Wire

Jewelry Wire consists of thin high-grade steel wires twisted together to give the wire its special flexibility, softness and strength. The transparent GRIFFIN HiFlex nylon coating allows the natural colour of the high-grade stainless steel wire to shine through and guarantees great durability, lasting flexibility and good protection against abrasion. GRIFFIN Jewelry Wire is soft and flexible enough to be knotted. GRIFFIN Jewelry Wire does not need an additional needle even when stringing the smallest pearls.

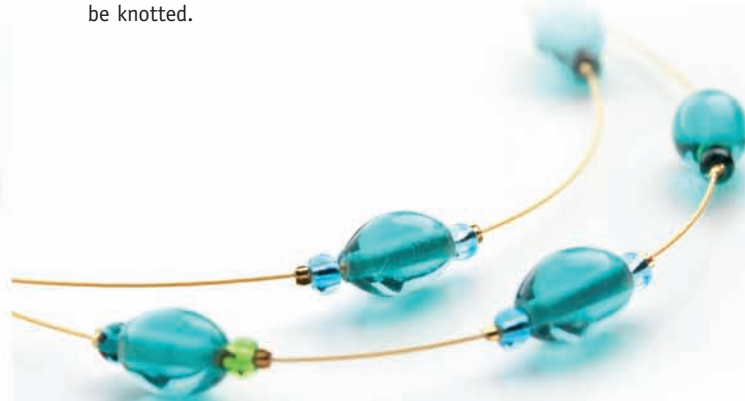

GRIFFIN Jewelry Wire is available with 49 and 19 strands: We offer Jewelry Wire 49 strand in 4 diameters (0.012, 0.014, 0.018 and 0.024 inch) and Jewelry Wire 19 strand in 6 diameters (0.010, 0.012, 0.014, 0.018, 0.021 and 0.024 inch).

Jewelry Wire 24k Gold Plated

24k Gold Plated Jewelry Wire consists of thin high-grade stainless steel wires plated with 24 carat gold and twisted together to give the wire its special flexibility, softness and strength. The transparent GRIFFIN HiFlex nylon coating allows the natural shine of the gold to show through and ensures great durability, long-lasting flexibility and gives good protection against abrasion. The gold plating is done with great care and effort: what we are offering here is a luxurious piece of outstanding elegance and beauty. Jewelry Wire 24k Gold Plated 19 Strand is the ideal choice for all fine jewelry such as necklaces, bracelets or earrings.

GRIFFIN Jewelry Wire 24k Gold Plated is soft and flexible enough to be knotted.

GRIFFIN Jewelry Wire 24k Gold Plated is available 19 strands in 4 diameters (0.014, 0.018, 0.021 and 0.024 inch).

Jewelry Wire silver-plated

Silver-plated Jewelry Wire consists of completely silver-plated miniature Stainless Steel Wires. The transparent GRIFFIN HiFlex nylon coating reveals the natural beauty of the silver and guarantees a long-lasting life. It offers ideal protection against abrasion and tarnishing of the silver. The times when "grey" Stainless Steel Wires were the basis for the creation of silver jewelry are gone.

Enrich your design options with this stunningly beautiful Jewelry Wire silver-plated of the highest quality. GRIFFIN Jewelry Wire silver-plated offers you an elegant and timeless beautiful foundation for your jewelry creations.

GRIFFIN Jewelry Wire silver-plated 19 strands is available in 4 diameters (0.014, 0.018, 0.021 und 0.024 inch).
